Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 171, Nos. 1 & 2, June 1997

S. Khare, L.K. Bhutanib and D.N. Rao: Quantitative assessment of tuftsin receptor expression and second messenger during *in vitro* differentiation of peripheral blood derived monocytes of leprosy patients 1–10

T. Volk, M. Hensel and W.J. Kox: Transient Ca^{2+} changes in endothelial cells induced by low doses of reactive oxygen species: Role of hydrogen peroxide 11–21

S.D. Varma, P.S. Devamanoharan and A.H. Ali: Formation of advanced glycation end (AGE) products in diabetes: Prevention by pyruvate and α-keto glutarate 23–28

C.D. Tandon, M. Forouzandeh, S. Aggarwal and R.K. Jethi: Inhibitors of *in vitro* mineralization from flexor tendons of rabbits and their role in biological mineralization 29–35

K. Burns, M. Opas and M. Michalak: Calreticulin inhibits glucocorticoid – but not cAMP - sensitive expression of tyrosine aminotransferase gene in cultured McA-RH7777 hepatocytes 37–43

M.K. Thakur and P. Chaurasia: Nuclease susceptibility of the rat liver satellite DNA-containing chromatin decreases with age 45–48

A.S. Shoker, M.A. Murabit, F.F. Georges, L.F. Qualtiere, H.G. Deneer and K. Prasad: Inhibition of human lymphocyte function by organic solvents 49–58

A.M.N. Sultan: The effects of anaplerotic substrates on D-3-hydroxybutyrate metabolism in the heart 59–64

P. Srivastava, G.D. Sharma, K.K. Kamboj, A.K. Rastogi and V.C. Pandey: Heme metabolism in promastigotes of *Leishmania donovani* 65–68

F. Viñals, M. Camps, X. Testar, M. Palacín and A. Zorvano: Effect of cations on the tyrosine kinase activity of the insulin receptor: Inhibition by fluoride is magnesium dependent 69–73

A.S. Shoker, H. Yang, M.A. Murabit, H. Jamil, A. Al-Ghoul and K. Okasha: Analysis of the *in vitro* effect of exogenous nitric oxide on human lymphocytes 75–83

A.P. Zumino, N.R. Risler, O.F. Schanne, E. Ruiz Petrich and A. Carrión: Magnesium: Effects on reperfusion arrhythmias and membrane potential in isolated rat hearts 85–93

S. Ray, S. Biswas and M. Ray: Similar nature of inhibition of mitochondrial respiration of heart tissue and malignant cells by methylglyoxal. A vital clue to understand the biochemical basis of malignancy 95–103

P.K. Sadhukhan, A.K. Chakraborty, A. Dasgupta and H.K. Majumder: Chromatographic separation of DNA dependent RNA polymerases and molecular properties of RNA polymerase II from a *Leishmania* Spp 105–114

F. Puntoni and E. Villa-Moruzzi: Phosphorylation of protein Phosphatase-1 isoforms by cdc2-cyclin B *in vitro* 115–120

Y. Dobashi, T. Kudoh, T. Ishidate, M. Shoji, K. Toyoshima and T. Akiyama: The Wilms tumor protein is persistently associated with the nuclear matrix throughout the cell cycle 121–126

Y. Hanahisa and M. Yamaguchi: Increase in calcium content and Ca^{2+}-ATPase activity in the brain of fasted rats: Comparison with different agents 127–132

Short communication

V.L. Kumar, P.K. Majumder and V. Kumar: Androgen deprivation causes up-regulation of androgen receptor transcript in the rat prostate 133–138
